Level of Difficulty	Estimated Homework	Prerequisites
<input checked="" type="checkbox"/> Moderate <input type="checkbox"/> Difficult <input type="checkbox"/> Very Difficult	0-30 minutes	<b>District</b> General computer experience. <b>Department</b> Drawing and Design recommended.

## Course Description

Video/Film is an Envision Cinema class that explores many aspects of video, television, and film production. Students in this digital ART course will learn to create original works and apply principles of art and technology to the genres of short film, documentary, music video, television news, promotional videos, and commercials. In addition, students will also learn industry-standard software programs such as FinalCut Pro, Motion, Soundtrack Pro, and Garage Band. Finally, students in this class will analyze and critique their projects, making connections to professional films and videos.

Instruction and activities include a balance of classroom study and practical work experiences. Technology is used to support and tailor content delivery to match students' learning styles, experiences, and skills. In addition to acquiring specific content skills, students learn to manage resources, work cooperatively, organize and apply information, understand systems, and apply appropriate technology through problem-solving activities.

Grades will be determined solely on a point scale. The total possible points available will be distributed through the three following categories: Preliminary Assignments (pre-preproduction work), Portfolio Assignments (major projects), and Studio Performance (involves using classroom and lab time wisely).

## Supplemental Information

10 credits

Meets high school graduation requirement for fine/performing art or elective

Meets UC/CSU subject "f" requirement
