

CCA Solar Panel Construction Map

Beginning in late September 2017, our district will begin fencing off an area in the student parking lot in preparation for the construction of solar panels, which will cover the last three rows (on the south side of the lot). This project has a tentative completion date of late January, which will be just in time for the increase in student drivers that we accrue each spring. There will be approximately 90 parking spots taken away from the student lot during construction. Please [click here](#) to see where students are able to park in both the Staff lot and the Visitors lot. Student parking in these lots is designated in the map with a yellow rectangle.

Please remember to drive slow, be safe, and practice kindness.

Thanks so much!

CCA Administration
